

While it has always been possible to check Longitudinal grinding within a defined movement area quickly and easily by means of a simple straightedge, the same has not been true of Transverse grinding without a Face Consultants surveyor and Digital Profileograph in attendance.... until now.

The Face Transverse Meter (above) is an invaluable tool to those who wish to save on the cost of grinding Transverse errors in VNA aisles. Quick to prepare and easy to use, the Face Transverse Meter allows the grinding technician to check his own work quickly, easily and accurately; minimising cost, maximising efficiency and taking the guessing out of grinding.

Box Contents:

- Transbar main body
- Stabilizing arm & wheel
- Wheels x2
- Spanners x 2
- Charger
- 4mm Shim
- Handle bar

Technical Specs:

- Dimensions:
 - Assembled: 55x(104-180)x67 cm (LxWxH).
 - In Box: 145x46x16 cm (LxWxH).
- Weight: 18.6 Kg.
- Power: 12v Ni-MH 2.2Ah rechargeable (17Hrs).
- Aluminium frame.

Price: On Application

Includes:

- 1/2 day's training at Kirkburton (UK)
- Telephone assistance – free of charge.
- Warranty: 12 months.
- Batteries 6 months.

Delivery not included.
