Warehousing & Industrial
Flooring Consultants

Face Consultants

Face Consultants specialise in the design and construction of warehouse and industrial floors. With over 20 years of international experience, we are uniquely qualified to provide advice to building owners and users in the logistics, food and other manufacturing sectors.

For new build or conversion, we assist owners and engineers at the critical design stage, advising on aspects such as flatness requirements and jointing plans - decisions that will have long term impact on the cost effective operation of facilities.

In established facilities, we offer a comprehensive range of surveying, testing, diagnostic and condition monitoring services - advising clients on repair and maintenance strategies.

Warehouse Efficiency

Floor quality has a significant impact on the efficiency of warehouses and distribution centres.

Face Consultants can identify opportunities for raising productivity and lowering costs.

Consultancy:
