

FACE CONSULTANTS LTD
Global Flooring Consultants

WHY YOU SHOULD USE **FACE CONSULTANTS** TO CARRY OUT FLOOR FLATNESS AND ABRASION RESISTANCE COMPLIANCE TESTING.

Face Consultants are UKAS accredited to **BS.EN ISO/IEC 17025 'General Requirements for the competence of testing and calibration laboratories'** to carry out floor flatness testing to the Concrete Society's Technical Report No. 34 (TR34), and accelerated abrasion resistance testing to check compliance with **BS 8204-2:2003**.

As of January 2006, no other Floor Flatness Testing Company has received UKAS accreditation for this type of work.

Identifying a **UKAS** accredited ISO 17025 testing body is easy. Look for the **UKAS** mark as proof of accreditation.

The United Kingdom Accreditation Service (UKAS)

UKAS is recognised by the UK Government as the sole UK national accreditation body responsible for assessing and accrediting the competence of organisations in the fields of inspection, measurement, testing and the certification of systems, products and personnel. You can visit their web site on www.ukas.org.

Other companies who offer this type of work are not UKAS accredited. This means that their competence is not independently verified.

As well as carrying out Floor Flatness testing in accordance with The Concrete Society's Technical Report No 34 and Abrasion Resistance testing to BS 8204-2:2003, we also have the equipment and capabilities to carry out unaccredited testing and diagnosis to other UK and international standards, as well as a consultation and design service.
