

Third Party Accreditation

For efficient operation of warehouses and distribution centres, floors must be of sound design and high quality construction. Long term truck operating costs and productivity can be seriously compromised by poor design or poor workmanship. Floor maintenance costs can be significantly and avoidably increased.

Face Consultants have the unrivalled experience and skills to provide complete floor project supervision – from scheme inception to the completed and operating warehouse.

Design

- Review floor loadings, structural design and specifications.
- Design joint layouts and define flatness requirements.
- Review contractor proposals and method statements and advise on contractor appointments.

On-site Monitoring

Face Consultants provide detailed quality plans specific to each project and then supervise the works.

This includes:

- Checks of ground preparation works.
- Checks of floor thickness.
- Construction process checks.

As Built Surveys

A) Surface Flatness Testing

Completed floors are surveyed using UKAS accredited procedures to ensure that the expected warehouse productivity and smooth running of the trucks will be achieved.

B) Abrasion Resistance Testing

2696

Floor durability is tested to the European Standard, in accordance with our UKAS accredited procedures.
