

The Face F-Speed Reader

After over 12 months in its development Face Consultants has produced a measuring device to the same exacting standards in accuracy and repeatability as the other Face digital devices used for checking the UK and European standards. The F-Speed Reader is used for checking a floors surface regularity to the ASTM E 1155 standard producing accurate F numbers at incredible speeds.

Surveying floors and producing reports couldn't be quicker or easier!

Simply program the test run length in to the F Speed Reader and it will self propel to that required distance to travel .All the required data is collected digitally and then transferred to the handheld Pocket PC data collection program, then the next run can start. When the Whole of the floor is surveyed the storage card removed and connected to your laptop or PC and all the survey data transferred to the F Speed Reader program. At the touch of a button the data is analysed and full report produced.

The complete kit Comprises Of:

- Robust Carry Case
- F Speed Reader Main Body
- Motor Drive Assembly
- Motor Drive Cable
- Spanners x 2
- Charger
- Steering Cable
- Pocket PC Handheld - Preload Face Software
- 256mb SD Card
- SD Card Reader & Cable
- 4mm Shim
- PC software

Technical Specifications:

Dimensions Box 98x48x16 cm (LxWxH)
Dimensions Assembled 72x35x20cm (LxWxH)
Weight 20 Kg
Rechargeable Battery 12v 4.5Ah NiMH
PC Compatibility: Windows® NT, 2000, XP
Aluminium Frame.

Price: On application

Includes:
1 day training at place of Manufacture
Warranty – 12 Months
Battery warranty 6 months
Delivery not included
